WE NEED STRENGTH IN NUMBERS

Hi, welcome to our very first newsletter. Wirral Residents Association are here to alert residents to some alarming developments happening right now, here on Wirral.

For many years, our local councillors and MPs have been behaving erratically, not representing our wishes, and are failing to do their jobs as public servants. Their strange behaviour and dubious decisions are actually harming us. Worse still, they're getting away with it ...

We were formed in August 2024 to finally PUT A STOP TO THIS !!

1. Wirral's pensioners were **BETRAYED** by ALL FOUR local MPs

Angela Eagle Matthew Patrick Alison McGovern Justin Madders

All of our local Labour MPs callously voted to remove UK pensioners' £300 annual heating allowance, potentially forcing them into making a very difficult decision this winter: "What on earth will we do when temperatures start to plummet? Heat or eat?"

ARE YOU ONE OF THESE PENSIONERS?

2. CRAZY 20 MPH speed limits

On average, Wirral has 5 deaths per year on its roads. Although every one of these deaths is a tragedy for the families concerned, nationally, it's an **EXTREMELY LOW** death toll. We can therefore relax, knowing our roads are safe. But local Councillors **DON'T** recognise this fact, and are desperate to help their central government masters by backing the national trend of applying snails' pace 20 MPH limits virtually everywhere! We say this is wasteful, illogical, and you cannot fix what isn't broken. With your help, we will be attending council committees, speaking up on your behalf, and challenging this madness!

3. £MILLIONS spent on new cycle lanes

Wirral Council has awarded a contract to move forward its plans for a new cycle lane that will connect Liscard and Birkenhead. This will cost taxpayers £10 million. It's money we don't have that's being squandered on what looks like a huge vanity project. Councillors are refusing to learn the lessons of the failed Fender Way cycle lane which created huge traffic back logs for the people of Moreton. These problems were both foreseeable and avoidable. We say again, join with us and we'll apply the people pressure needed to make them think again.

PEOPLE POWER CAN PREVAIL!

4. Council tax increases / services slashed

Q. Which is the **ONLY** 'product' in the world that shrinks in size as its price goes through the roof?

A. Council tax.

When we pay council tax, we feel as though we've bought a pint of beer, sat down, then gazed in horror because half of it's disappeared AND we've been charged **DOUBLE!** Hiking tax while cutting services is what Wirral Council have been doing repeatedly for years. Officials **KNOW** we'll be sent to prison if we don't pay up, so they feel very **SECURE**, drunk on power, knowing they can stick the knife in again and again.

**WE'RE NOT STANDING FOR THIS
RIP OFF ANY LONGER!!**

5. Dangers of 5G radiation

The World Health Organisation found 14 years ago: Electro Magnetic Frequency/ Radio Frequency radiation is a potential carcinogen (could cause cancer). 1000s of independent studies across the world have since concluded EMF/RF IS carcinogenic and **DOES** cause cancerous tumours. Have you noticed 5G masts are being erected all over Wirral? What you may not know is: planning permission **ISN'T REQUIRED** for certain equipment due to the UK government's reckless relaxation of planning guidelines.

WE'RE SITTING DUCKS!!

6. 5G masts local to Wirral Wards

In the weeks and months to come, Wirral Residents Association members will be visiting 5G masts all across Wirral, ward by ward. Look out for us. We'll be wearing hi-viz vests, lanyards, carrying RF / EMF meters, taking readings and checking if power outputs are exceeding safe levels, as has been repeatedly found in Liverpool. Initially, we'll concentrate on masts installed very close to primary and secondary schools. Children have far more delicate bone structure, and are much more vulnerable / susceptible to the adverse impacts of harmful EMF radiation. Two special needs schoolchildren recently died at a school in Liverpool. There was a 4G mast only a few yards away and no cause of death has been announced yet. Our survey findings will be publicised in order to notify the public of the clear and present dangers in their midst.

7. Proposed new car parking charges

The borough's existing parking charges have already diminished visitor numbers, but the council have failed to register this. Senior officers and councillors are now doubling down on a bad idea. People already struggling due to the cost of living crisis will be in no position to afford these extra parking charges. The proposed extensions to various locations - particularly New Brighton - will also be devastating to small businesses. These extra parking charges key into the many ill thought-out strategies outlined above and overall, speak of what appears to be a desire to make life difficult for residents *and* visitors. Would a council eager to attract visitors and shoppers behave like this? NO. The only conclusion we can reach is that the council has received unseen orders from above and is on a mission to carry out these reckless, pointless plans.
